- (A) Being a weight-bearing (B) Being a weight-born  
(C) For been a weight-bearing (D) For being a weight-born

### III. Reading Comprehension: Choose the best answer for each question. 20%

#### Passage 1

Around 4000 years ago, in an important step in their socioeconomic evolution, people started to breed animals and process their milk. That's when cheese was born. We say "born" because cheese cannot really be said to have been "invented." It must have resulted from the simple observation that milk left in a container ends up changing to a solid state. This might be considered the first technological cheese-making discovery.

While Cheddar is the most popular cheese in the world today, a trend in modern cheese making is to invent new kinds of cheeses. Scientific advances in the study of nutrition have prompted shifts in consumer preferences, resulting in a sizable market for low fat cheeses, and even vegetarian cheeses made from soybeans instead of milk. Furthermore, as the human diet becomes more varied, there is also a trend towards cheeses with gourmet additives, such as salmon or dill flavorings.

So here's food for thought: if Asia continues its fascination with Western culture, and cheese makers continue to invent new products for new markets, it is possible that one day we will even see a stinky tofu cheese! If you ever saw such a cheese on the supermarket shelf, would you be even slightly tempted to buy some?

21. According to this article, human eating habits have improved in terms of which of the following options?
- (A) Preferences and markets (B) Nutrition and variety (C) Animals and milk (D) Additives and marketing
22. Modern cheese marketing trends can best be described as \_\_\_\_\_.
- (A) market-driven invention (B) Cheddar popularity (C) catering to the Asian market (D) low fat vegetarianism
23. According to this article, which of the following statements is NOT true?
- (A) Cheese originated as the result of a natural transformation of milk.  
(B) Virtually any flavor of cheese is imaginable.  
(C) Science says that avoiding fat and meat can be healthy.  
(D) Cheddar is a very modern cheese with gourmet additives.

#### Passage 2: Questions 24-27 refer to the following advertisement.

##### ONCE-A-YEAR SUMMER SALE!

##### SAVE \$100 OR MORE!

This month only, every membership plan is substantially reduced. That's great! But the real excitement at HRC comes from what people do.

##### Nautilus

Ours is the most complete and advanced equipment available.

##### Free Classes

We offer over 120 free classes each week including aerobic and tap dance, calisthenics, yoga and more. You'll also enjoy free clinics in racquetball, squash and tennis. Don't forget about our whirlpools, saunas and swimming pools either.

##### Guarantee

Come to HRC for 3 days. If all that action leaves you less than satisfied you'll get a full refund.

##### 5 Locations

By the way, your membership allows you to use all 5 locations in Manhattan 7 days a week.

Give us a call or drop by for more information.

**Sale Ends Aug. 31st!**

**NEW YORK HEALTH & RACQUET CLUB**

24. The advertisement emphasizes \_\_\_\_\_.
- (A) locations (B) a trial membership (C) reduced cost (D) opening hours
25. It can be inferred that if you join the club \_\_\_\_\_.
- (A) the sale ends on August 31 (B) you will go to all five club locations  
(C) your body will improve (D) you will get a refund
26. From the context of the expression *free clinics*, it must mean \_\_\_\_\_.
- (A) cost-free medical care (B) no charge for lessons (C) liberated movement (D) low-cost games
27. Membership in the club enables you to enjoy \_\_\_\_\_ in winter.
- (A) the cold (B) a full refund (C) dropping by (D) swimming

### Passage 3

Of all the accessories and adornments to garments one perhaps pays least of all attention to buttons. Functional and often unexciting, replaced by zip fasteners or hooks and eyes there is, one would think, nothing much to be said about the humble button.

Yet it is very probable that buttons started life as ornaments; certainly it is not known that they had any practical function until the 13th century. By the 14th century buttons were once again ornamental, often lavishly so, to such an extent that it was by no means uncommon for a person of wealth and consequence to have as many as 300 buttons on a single article of dress. Unimaginable as it seems today, sewing superfluous buttons on clothes became a craze—not one that seems harmful to us though some Italians took a different view and a law against buttons was enforced in Florence. No buttons were to be worn on the upper arms; penalty for disobedience—a sound whipping. (How often this had to be carried out, history does not relate!)

Most of the buttons on modern clothes which could be called decorative once did in fact serve a useful purpose. Buttons on boots are one good example. Sleeve buttons on men's coats are a reminder of the days when the fashion was for wearing shirts with frilly lace cuffs.

On the tails of a modern tail coat there are indeed buttons which are purely ornamental but in earlier days horsemen used these buttons to keep the tails out of harm's way.

With regard to the side on which clothes are buttoned, originally both male and female dress was buttoned on the left hand side. Changes came when men had to have access to their swords.

So perhaps it is worth taking a look at buttons.

28. Buttons are \_\_\_\_\_.
- (A) the only accessories and adornments one pays little attention to  
(B) one of the accessories and adornments which receives least attention  
(C) one of the best adornments to any garment  
(D) a very useful accessory
29. Buttons have been used as ornaments \_\_\_\_\_.
- (A) on and off throughout their history (B) before the 13th century  
(C) since the 14th century (D) only in modern times
30. In the Italian city of Florence \_\_\_\_\_.
- (A) all buttons were banned because they were a craze  
(B) buttons were forbidden to be worn on the upper arms  
(C) buttons were considered harmful as they drove men crazy  
(D) superfluous buttons were only sewn on single articles of dress
31. The punishment of whipping \_\_\_\_\_.
- (A) was often carried out (B) has been related in historical documents of the time  
(C) was never carried out (D) was possibly carried out but we don't know how often

32. Buttons on the tails of a modern tail coat \_\_\_\_\_.
- (A) were always purely ornamental  
 (B) were used to keep the horse's tail out of the way  
 (C) are now only used by horsemen to stop their tails being harmed  
 (D) were once useful to horsemen
33. Male and female dress \_\_\_\_\_.
- (A) is buttoned on the left side  
 (B) is now buttoned on the right side  
 (C) is buttoned now on different sides  
 (D) is buttoned on the same side

**Passage 4**

The small platform became increasingly crowded and by quarter to nine (half an hour after the train was due) there was hardly space to move. Mostly the people were farmers and their wives going in to the local market town for market day. The elderly taxi which was all that the district boasted rattled and screeched its way into the station yard and shuddered to a halt just as the train finally rumbled into the station. Mrs. Smith, a stout elderly woman whom I knew well by sight, tumbled out clutching a shabby bag, a mackintosh and various parcels. Puffing and panting, she shoved her way through the crowd till she reached the engine, and, to my intense amusement, climbed up into the cab.

"Bill," she bellowed above the noise of the train. "Sarah's had the baby—it's a boy!"

All the would-be passengers let out a cheer and I realized that of course Mrs. Smith was the engine driver's aunt.

"Thanks!" said Bill. The engine gave out an ear-splitting whistle and we hastily climbed in.

Bill's delight in his fatherhood expressed itself by the speed at which he drove the train and never have I had such a terrifying journey by rail.

34. The train \_\_\_\_\_.
- (A) was due at a quarter to nine  
 (B) had been due at a quarter past nine  
 (C) was already late at a quarter to nine  
 (D) was nearly on time
35. The platform \_\_\_\_\_.
- (A) became more and more crowded  
 (B) was already very crowded  
 (C) became less crowded after quarter to nine  
 (D) needed increased space
36. The author \_\_\_\_\_.
- (A) disliked Mrs. Smith because she was stout and elderly  
 (B) knew Mrs. Smith but not to speak to  
 (C) had never seen her before  
 (D) thought she was being a nuisance
37. Mrs. Smith \_\_\_\_\_.
- (A) fell down after she got out of the train  
 (B) fell over her parcels because she was clumsy  
 (C) got out of the taxi as quickly as possible  
 (D) bumped into the taxi driver who was carrying her parcels
38. Mrs. Smith had come to the station \_\_\_\_\_.
- (A) to tell the engine driver that his wife had had a baby  
 (B) to boast that she was the baby's aunt  
 (C) to stop the train because of the baby  
 (D) to take the news to the local market town
39. The passengers, when they heard the news \_\_\_\_\_.
- (A) were all smiling  
 (B) shouted "Hurrah!"  
 (C) clapped loudly  
 (D) let themselves become very cheerful
40. Because Bill had become a father \_\_\_\_\_.
- (A) the author was terrified of traveling by train  
 (B) he made the train go so fast that the author was terrified  
 (C) the author never travelled by train again  
 (D) the author determined never to go by rail if he could help it

**IV. Composition: Express your ideas in no more than 250 words. 20%**  
**On Cosmetic Surgery**
